Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended): Docking buffer to be attached to ramps, especially loading ramps and loading bridges, with elastic damping element (3) between two first and second U-shaped parts (1;2) made of hard, shock-resistant material the limbs of which (4;5 and 6;7) are located next to one another and can be displaced in relation to one another, wherein the limbs (4;5) of the <u>first</u> U-shaped part (2) are convergent around an angle (α) deviating from 90° to a first base plate (9) and the limb (6;7) of the $\underline{\text{second}}$ U-shaped part (1) are convergent around an angle (α β) deviating from 90° to a <u>second</u> base plate (8), whereby the opening widths between the ends of the limbs (4;5) and (6;7) and the sizes of the angles $(\alpha;\beta)$ are selected so that the limbs

(4;5) of the first U-shaped part enclose the limbs (6;7) of the second U-shaped part.

Claim 2 (Currently Amended): Docking buffer in accordance with claim 1, wherein the size of the angle $(\alpha; \beta)$ is selected, depending on the lengths of limbs (4;5;6;7), so that in cases of unilateral impact of the first U-shaped part (2) its limbs (4;5) cannot spatially avoid the enclosing of the limbs (6;7) of the second U-shaped part.

Claim 3 (Currently Amended): Docking buffer in accordance with claim 1, comprising wherein the limbs (6;7) being are welded to a the second base plate (8) and form the second U-shaped part (1).

Claim 4 (Currently Amended): Docking buffer in accordance with claim 1, wherein the docking buffer is attached to a ramp (12) with the second base plate (8) by means of a mechanically detachable connection (11).

Claim 5 (Currently Amended): Docking buffer in accordance with claim 1, comprising a supporting device, preferably punched sheet metal or grid, being attached on the a bottom end of the second U-shaped part (1).
